

February 2019

Time to start the cool weather sprouts, chard, pak choy, spring greens, radishes, snow peas. No shadow for groundhog so hopefully spring will be early. Below is a picture of the new Led Light Aerogardens being used to start spring greens...These will be transplanted when it gets warm enough. Other vegetables are being started in peat Jiffy Strips.

The garden moved inside for the winter. It includes, Rosemary, Hibiscus, Palm, Amaryllis, orchids, Hydrangea, Begonia, Christmas Cactus, Bamboo, sugar cane, Ti Plant, Aloe, etc. Tulips and spring vegetables are being started here.
