

Have been harvesting these delicious little Yellow Cherry Tomatoes. Still waiting on the little peppers in the AeroGardens. We are going to try to use the Aero Gardens for seed starting this year. Sometimes there is not sufficient light for the little sprouts so this is going to be an experiment.

Have posted under Garden Give Away a link on the Home Page to a gardening Ap from Territorial Seed Company for your phone. It's free to try and you can take it with you in the garden!
